

OVIIYA MEDSAFE

# EXCELLENCE IN PHARMACOVIGILANCE

# PORTFOLIO

## Our Roots

Oviya MedSafe was formed in 2012 as an extension of the diverse portfolios in which our founding groups have excelled collectively for more than 100 years. Through our wide and extensive experience in healthcare, education, outsourcing and management industries, we are committed to proactively support the growth of drug safety practices across the globe.

## About Us

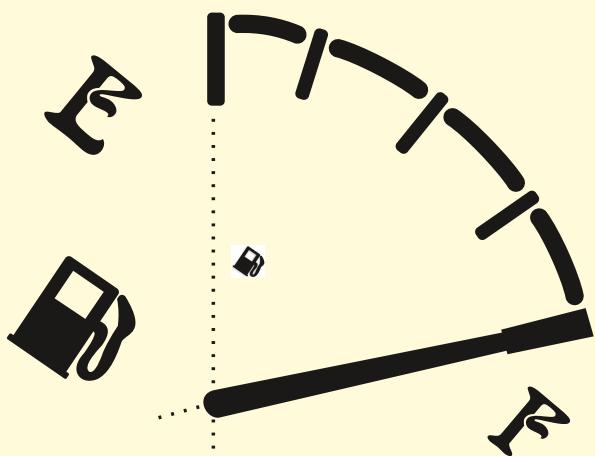

Oviya MedSafe is a Pharmacovigilance Consulting & Drug Safety Services company with expertise in providing end-to-end pharmacovigilance support across the globe. Our team of well-experienced professionals with diverse and complementary educational backgrounds in medicine, pharmacy and life sciences deliver the highest quality of services that cater to our clients' needs.

## Mantra

We inculcate the pharmacovigilant culture in our team – which we take pride in acknowledging as our success mantra. Ample knowledge and relevant skills empower us to provide advice and assistance on various facets of pharmacovigilance. We believe in customer service and satisfaction through our industry-valued standards and by nurturing long-term, engaged and mutually beneficial partnerships. Our experience, professionalism and energy set Oviya MedSafe's standards of unparalleled commitment and flexible approach.

## About Our Hometown

Surrounded by the Western Ghats and often referred to as the Manchester of South India, Coimbatore is the sixteenth largest urban agglomeration of India. Establishing itself as one of the fastest growing cities in India, Coimbatore is a major textile, industrial, commercial, educational, information technology, healthcare and manufacturing hub of Southern India. Coimbatore has been ranked 4th among Indian cities in investment climate by the Confederation of Indian Industry (CII) and ranked 17th among the top global outsourcing cities by Tholons. Coimbatore has sister city relationships with Toledo, Ohio in the United States and Esslingen in Germany.

## The Need

The regulatory requirements for medicinal products have changed from purely passive monitoring and reacting to alerts to a proactive and patient-centered approach. Therefore, the regulations on drug safety monitoring have become more stringent, mandating companies to carry out more pharmacovigilance activities, leading to dramatic cost increases to pharmaceutical companies, which can be minimized by smart outsourcing.

## Expertise

Oviya MedSafe has established and set itself alone as a company providing pharmacovigilance consulting and drug safety services. Efficient infrastructure, industry best practices and keeping phase with regulatory and corporate compliance makes us a compelling choice for partnerships.

As a team of entrepreneurs, physicians, healthcare professionals and acclaimed business leaders, we are committed to deliver high-quality, cost-efficient service. Beyond that as a full-service based firm, Oviya MedSafe is configured to be your strategic partner pursuing sustainable competitive advantage.
